# **3D Printing & Design**

## **For Junior High and High School Students**

# **TechCamp**

## ***Think It... Make It™***

### **The Next Industrial Revolution**

3D printing is truly a revolutionary technology. It will unleash creativity and designs previously not imagined -- from crafts and fun to real world parts and products.

### **Energizing Creativity**

Coupling 3D design with 3D printing fuels creativity. By imagining, then virtually creating and then quickly printing the physical model, the creative juices really start to flow. Creating an object is empowering and doing so quickly with quality, amplifies that emotion. We call our students "creators".

### **TechCamp Basics**

If you would like more information, click here or visit [www.Create-3D.biz/TechCamp](http://www.Create-3D.biz/TechCamp).

- TechCamps are limited. Only 12 creators per Camp - only 3 camps (July & August)
- Creators will learn an easy-to-use free program for design
- Creators will create 3 custom designs and take home the 3D prints
- Each day will include news and information about the industry
- Tuition is \$250
